The dashboard is also available at: <https://z35ff9-benjamin-hobbs.shinyapps.io/stat408-severe-weather/>

Questions for Feedback

1. The dashboard has four pages (About, Event Trends, Variability, and Summary). Is it clear what each page is showing and why?
2. The variability analysis uses the coefficient of variation (CV) to compare event types. Is this concept explained clearly enough for someone who has not seen it before?
3. Is there anything missing that you would expect to see in a project about severe weather trends?
